DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 23-28 and 39-44 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by JP 08-215433 to Toyama Shigeki. A detailed reading of the Shigeki reference by an artisan of ordinary skill discloses all of the claim limitations. Paragraph 9 discloses a voice data storage means. Paragraph 21 discloses that the computer program may choose 2 or more expressions meaning the same thing randomly and paragraph 9 says that this is done in real time. Paragraph 23 discloses substitution data 25 states two or more voices 33 states that other types of games can use the invention with a 3d virtual representation, and paragraph 56 states that the junction electronic speech circuit 50 of an example is constituted including the pattern distinction circuit 52, the speech synthesis section 54, the voice data storage section 56, and the junction change over section 70. Paragraphs 80-88 discloses an example of the embodiment with reference to multiple data storage areas for selection based on a action of the game, which in this case is starting the game. Other examples are within the description. Paragraph 90-96 discloses that different voice data may be inserted at different junctions or points in the game.
